

SSAS Practitioner.com offers free take over and set up for SSASs, with low annual fees

SSAS clients may want to consider their options before continuing with the services of expensive 'traditional' SSAS providers, say SSAS Practitioner.com.

SSAS Practitioner.com Limited is a newly-established pensions company that has been formed in reaction to the high fees charged by traditional SSAS providers, and in the belief that SSAS charges need shaking up. SSAS Practitioner.com believes that SSASs are a hugely beneficial asset to smaller companies and are proud to be able to offer a SSAS with high-quality service at an extremely competitive price.

SSAS Practitioner.com charges £800 pa + VAT, fully inclusive (up to 4 members), for managing your SSAS. There are no 'time-cost' or 'fee-menu' style additional charges. Most providers charge extra for setting up or taking over a SSAS; not SSAS Practitioner.com. A free calculator on the SSAS Practitioner.com website illustrates the large savings available and the subsequent enhancement of retirement benefits for those willing to switch away from other, more expensive, SSAS providers.

SSAS Practitioner.com specializes in the design and administration of SSASs for the benefit of members and their companies. It offers a wealth of experience in the pensions industry, particularly in SSAS provision.

The service provided by SSAS Practitioner.com comprises comprehensive management of your SSAS and general advice. It provides impartial comments on the suitability of particular investments and makes you aware of other issues that are not always considered by investment advisers. SSAS Practitioner.com does not offer investment advice and concentrates principally on managing your scheme. It considers that this approach works best for the provision of a simple, efficient and cost-effective SSAS that maximizes the value of your pension fund.

Potential clients can apply online for set up or takeover of their SSAS on the SSAS Practitioner.com website. The website also offers a free selection of online tools and calculators of benefit to SSAS clients.

If you wish to have your SSAS administered by SSAS experts, who provide a great service at low cost, contact SSAS Practitioner.com:
